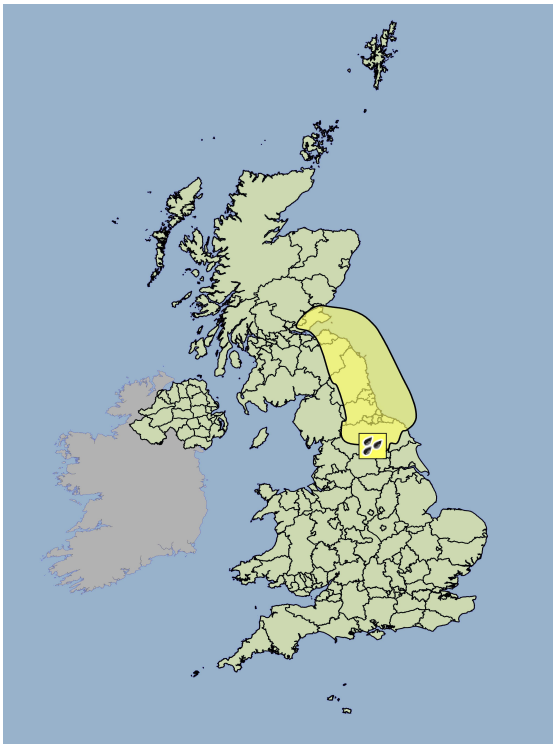
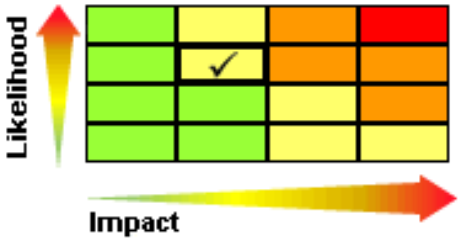
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system is expected to move northeastwards on Thursday. Although there remain uncertainties in the precise details and timing of this system, there is concern that areas that have experienced exceptionally wet weather may well see further heavy rain, bringing a renewed flood risk.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **04:00 on Thu, 07th Jan 2016** until **21:00 on Thu, 07th Jan 2016**

A band of heavy and possibly prolonged rain is expected on Thursday across parts of northeast England and southeast Scotland. Rainfall totals of 10-20 mm are likely quite widely, with perhaps over 30 mm on high ground.

Given the earlier wet weather please be aware of the renewed risk of flooding and disruption to transport.
